

Patient Information Leaflet

hydroxyisohexyl 3-cyclohexene carboxaldehyde (Lyral™)

Lyral is a synthetic fragrance.

It is frequently used in cosmetic products. In particular it is used in high concentration of 3% or more in fine fragrances. It is also used in deodorants as well as in household cleaning products.

If present as an ingredient of a cosmetic or household product it will be included on the cosmetic labelling as hydroxyisohexyl 3-cyclohexene carboxaldehyde.
