

Patient Information Leaflet

Quaternium 15

You are allergic to the chemical Quaternium 15.

Quaternium 15 is a preservative which kills bacteria, fungi and moulds. It is water soluble and is used in cosmetics and in industry. It is important that you read the labelling of ingredients of cosmetics and toiletries and avoid any which contain Quaternium 15.

Allergic dermatitis reactions to Quaternium-15 contained in exposure to photocopier toner and ultrasound gel have been reported, but these cases are uncommon and the majority of reactions occur from exposure to quaternium15 contained in cosmetics and toiletries.

ALWAYS READ THE INGREDIENT LABELLING
